### Dr. Fabian Fröhlich

**Private Address:** 

Karlsruher Strasse 54 69126 Heidelberg

Mobile: +49 167 45296749

**Professional Address:** 

Institute for Computational Biomedicine Im Neuenheimer Feld 130.3

69120 Heidelberg

E-mail: fabian\_froehlich@hms.harvard.edu

## **Education & Research Activity**

web	Visiting Fellow at University Hospital Heidelberg, Heidelberg, DE Research Group: Systems Biomedicine, Institute for Computational Biomedicine Focus: Structure based modeling, data-driven models of heterogeneity, automated model formulation PI: Julio Saez-Rodriguez, PhD	since 2022
web	Postdoctoral Fellow at Harvard Medical School, Boston, MA, USA Research Group: Laboratory of Systems Pharmacology, Harvard Institute for Therapeutic Science Focus: Adaptive resistance in melanoma, model interpretability, protein-structure based modeling PI: Peter Sorger, PhD	since 2018
web	PhD Candidate at the Helmholtz Zentrum München, Munich, Germany Research Group: Data-Driven Computational Modeling, Institute for Computational Biology Focus: Scalable simulation and estimation for ODE models, efficient description of cell-to-cell variability Thesis: Scalable Methods for Parameter Estimation in Systems Biology (Defense Date: 29.03.2018) Degree Granting Institution: Technische Universität München PI: Prof. Dr. Jan Hasenauer	2013-2018
web	Graduate School Quantitative Biosciences Munich (QBM), Munich, Germany Course Work: Monthly lecture series and journal clubs with external speakers, monthly life sciences primer Workshops: Scientific Writing, Grant Writing, Presentation Skills, Poster Design	2013-2018
web	Master of Science at the Technische Universität München, Munich, Germany Principal Subject: Mathematics in Bioscience Focus: Parameter inference, biophysics, numerical methods Thesis: Approximation and Analysis of Probability Densities using Radial Basis Functions Thesis Advisor: Prof. Dr. Jan Hasenauer	2011-2013
web	Bachelor of Science at the Technische Universität München, Munich, Germany Principal Subject: Mathematics Secondary Subject: Physics Focus: Mathematical modeling, image processing, dynamical systems Thesis: Modelling and Analysis of DDEs for Hysteresis in Bacterial Quorum Sensing Thesis Advisor: Prof. Dr. Christina Kuttler	2008-2011

# **Awards & Fellowships**

web	MTZ®-Award for Medical Systems Biology 2020 (PhD Thesis)	2020
web	3-year Long-Term Fellowship from the Human Frontier Science Program (HFSP)	2019-present
	3-year PhD fellowship from the German Research Foundation (DFG)	2013-2016
web	International Genetically Engineered Machine Competition (iGEM) Best Wiki (overgraduate division, worldwide)	2014
web	International Genetically Engineered Machine Competition (iGEM)  1st Runner Up (undergraduate, Europe; second best of 27 international teams)  1st Runner Up (undergraduate, worldwide; second best of 112 international teams)  Best Environment Project (undergraduate, Europe + worldwide), Best Wiki (undergraduate, Europe)	2013

	Mentor of Graduate Student during Summer Internship Student: Javiera Cortes	2022
web	Dana-Farber/Harvard Cancer Center – Harvard Medical School Mentor Training Courses: Assessing, Understanding and Maintaining Effective Communication; Designing Short Term Research Projects; Equity, Inclusion and Navigating Research Culture	2019
	Mentor of PhD Candidate Student: Paul Stapor	2016-2018
web	Foundation Level Certificate of Teaching in Higher Education (60 hours)  Courses: Designing and Conducting Examinations, Fostering Students Self-Directed Learning, Principles of Professional Teaching in Higher Education, Presentation Techniques, Role as Lecturer	2014-2018
	Teaching Assistant at the Technische Universität München Lectures: Statistical Inference for Dynamical Systems, Parameter Estimation for Dynamic Biological Systems I, Parameter Estimation for Dynamic Biological Systems II Responsibility: Lectures (substitute) and tutorials, conception and grading of exercises and examinations	2015-2017
	Fabina Frählich	Dana 4 a4

Fabian Fröhlich

	Co-Supervisior Master's Thesis Student: Laura Fink Thesis: Model selection in deterministic models of mRNA transfection	2015
Pres	entations (invited, oral)	
13	Maximum likelihood estimation and profile likelihoods Workshop on Statistical Inference for Dynamical Systems, Berlin, DE	2022
12	Mechanistic Models for Data-Driven Drug Sensitivity Prediction Francis Crick Institute, London, UK	2022
11	A Mechanistic Model of MAPK Signaling Reveals how Allostery and Rewiring Contribute to Drug Resistance Pfizer Systems Modeling & Simulation Network Webinar, Virtual (US)	2022
10	Dynamic Models for Data-Driven Drug Sensitivity Prediction Department of Protein Science, KTH Royal Institute of Technology, Virtual (SE)	2022
9	Kinetic Models for Data-Driven Drug Sensitivity Prediction Faculty of Science, Stockholm University, Virtual (SE)	2022
8	Mechanistic Models for Individualized Prediction of Resistance to Targeted Anti-Cancer Drugs VIB Cancer Biology Lecture Series, VIB-KU Leuven Center for Cancer Biology, BE	2021
7	Mechanistic Models for Personalized Drug Sensitivity Prediction LySiM status seminar (MTZAward Ceremony), Virtual (DE)	2021
6	Causal Deconvolution of a Mechanistic Model of EGFR and ERK Signaling explains Adaptive and Genetic Resistance in Melanoma Novartis Institutes for Biomedical Research, Virtual (US)	2020
5	In search of insight: Understanding large mechanistic models Timmer Group, University of Freiburg, DE	2019
4	In search of insight: Understanding large kinetic models BioQuant, Heidelberg, DE	2019
3	Unraveling Complexity in Large Kinetic Models  Department of Computational and Systems Biology, University of Pittsburgh, US	2019
2	Efficient Parameterization of Large-Scale Mechanistic Models Enables Drug Response Prediction for Cancer Cell Lines Instituto de Investigacións Mariñas, Consejo Superior de Investigaciones Científicas, ES	2017
1	Accounting for Variability in Cell Populations BioQuant, Heidelberg, DE	2015
Pres	entations (contributed, oral)	
21	A Mechanistic model of EGFR and ERK signaling reveals how allostery and rewiring contribute to drug resistance ICSB 2022, Berlin, DE	2022
20	A Mechanistic Model of EGFR and ERK Signaling Reveals how Allostery and Rewiring Contribute to RAF and MEK Inhibitor Resistance ECMTB 2022, Heidelberg, DE	2022
19	Scalable Calibration of Large Cancer Related Signaling Pathway Models in HPC Environments ECCB 2022, Simulating Cellular Behaviours Workshop, Virtual	2022
18	Fides: Reliable Trust-Region Optimization for Parameter Estimation of Ordinary Differential Equation Models COMBINE 2021, Virtual	2021
17	Causal Deconvolution of a Thermodynamic Model of MAPK Signaling explains Adaptive and Genetic Resistance to Targeted Drugs in BRAF-mutant Cancers INCOME2021 Conference and Hackathon, Virtual	2021
16	Causal Deconvolution of a Mechanistic Model of EGFR and ERK Signaling Explains Adaptive and Genetic Resistance in Melanoma Computational Approaches for Cancer Workshop, Virtual	2020
15	A thermodynamic Model of EGFR and ERK Signaling explains Adaptive and Genetic Resistance in Melanoma COMBINE 2020, Virtual	2020
14	Making Sense of Large Kinetic Models Intelligent Systems for Molecular Biology (ISMB), Basel, CH	2019
13	Simulation and Sensitivity Analysis for Large Kinetic Models in AMICI COMBINE 2019, Heidelberg, DE	2019
12	Hierarchical Modularization of Rule-Based Modeling Enables Construction of Complex Mechanistic Models CSHL Meeting: Cellular Dynamics & Models, Cold Spring Harbor, US	2019
